WALLTECH BLUE

Light Brick Cleaner

Walltech Blue is a specialised brick and wall cleaner formulated for removal of stubborn stains, efflorescence and accumulated deposits on light coloured bricks and masonry surfaces. Fast and effective cleaning action allows most stains to disappear immediately. For best results Walltech Neutraliser should be used immediately after treatment.

Directions Apply directly to the surface being treated. In most cases the stain will disappear immediately. For difficult stains allow extra time before hosing off with plenty of water. Always test on a small obscure area first and avoid contact with other surfaces. Windows, frames and doors should be covered with plastic sheeting to avoid damage to surfaces. Neutralise surfaces with Walltech Neutraliser after treatment.

Advantages Walltech Blue is a specialised combination of inorganic acids and acid salts that enable removal of stains and deposits that can not be removed by conventional brick cleaning products.
